Device Configuration

Adding your devices to a Zigbee network

Once the hub is ready to add the smart switch, pairing begins automatically when power is supplied. The switch appears in the controller's menu when paired.

To remove and reset the device

Choose to remove the lighting device as instructed by your hub. The controller indicates the smart switch was removed.

To return to factory defaults

If plugged in, unplug the switch. Press the program button while plugging in the switch –must release button within four seconds of plugging in the switch
